
Write your answer in **220 – 260** words in an appropriate style.

Your class has attended a panel discussion on what are the greatest disadvantages of digital and computer technology for people in their everyday lives. You made the notes below.

Disadvantages of digital and computer technology in everyday life

- ✎ Data security
- ✎ Privacy
- ✎ Crime and Terrorism

Some opinions expressed in the discussion:

“It can be very difficult to keep this data safe. Just a single breach can mean vast amounts of private information going into the wrong hands”

“It's become much harder to have personal privacy in the digital world. Digital cameras watch and record our movements in public places.”

“The internet is fertile territory for evil to operate. For example, terrorists use social media to promote themselves and encourage others.”

Write an essay for your tutor discussing **two** of the disadvantages in your notes. You should **explain which disadvantage you think is the greatest** for people and **provide reasons** to support your opinion.

You may, if you wish, make use of the opinions in the discussion, but you should use your own words as far as possible.
