# Present a Green Project

What makes a good speech?

What are some of our concerns about the planet?

Who are we talking to and what are they interested in knowing?

What solutions can we suggest to help solve environmental problems?

**In this project, you might need to talk about ...**

| **Environmental problems:** | deforestation | drought | flood |
| --- | --- | --- | --- |
| | hurricane | pollution | rising sea level |
| | global warming | waste | wildfire |

**Explaining the problem:**   If we continue to ..., we will ....
If we don't ..., (the environment) will ...
If we ..., the problem will ...

**Suggestions for fixing the problem:**   We have to ...   We must ...
We should ...   We need to ...

**Slogans:**
It's our (planet), it's our (responsibility), it's our (job).
Time to (change)!
Less ... and more ...!
This is what matters.

10

# Present a Green Project (2)

# Project stages

1. Get ideas

2. Do some research

3. Plan our speech

4. Write our speech

5. Practice

6. Find ways to improve

7. Present!

# Success Criteria

Work together as a group

Make a project plan to help you organise

Plan and write your speech

Use catchy slogans

Explain why action is necessary

Practise and improve what you've done

Speak clearly and persuade your audience
