

## **Which one is you?**

Key. Look at your answers and decide which you have most of and then read what this says about you. Do you agree?

### **Mostly a**

You are superstitious about almost everything! You are careful to look out for things that might bring you bad luck and try to avoid them at all times. You also have lucky charms or items that you think bring you luck. Be careful not to let your superstitions take over your life though!

### **Mostly b**

You are familiar with superstitions and sometimes follow them. You are careful and there are some things you don't do and you may have lucky charms but you just don't let superstitions rule your life!

### **Mostly c**

You know about superstitions but they are not really a big part of your life. You understand why some people are superstitious but prefer to let life happen. You do however believe that luck can sometimes play a part in our lives and what happens to us.

### **Mostly d**

You have no time for superstitions or luck and believe in facts and science. You think superstitious people should wake up and see what happens to them has nothing to do with whether they follow superstitions or not. There is no such thing as good or bad luck, you make your own luck!
