

TASK

- You are going to teach the class one of your favourite practical hobbies or skills, making sure they are all involved.
- Think back to the types of learner there are in the class to try and make it easier for them to remember what you are teaching them.
- Try to use some of the 'brain hack tips' to help you. You can also use props. Give instructions to the class clearly using imperative forms.
- When you are finished, check and see if the class can remember what you have taught them.

USEFUL LANGUAGE

- I have chosen today to teach you how to... because...
- First you need to take a/stand up/hold....like this...
- Then/next you...
- Keep... verb+ing and try not to...
- That's exactly right!
- That's nearly it, just try to...
- Let me see what you have...

SUCCESS CRITERIA

- I taught the class how to do something I like/am passionate about.
- I used information from the class learner profiles to help me teach.
- I made sure everyone was involved and used some of the useful language for presenting my ideas.
- I encouraged my classmates and gave them feedback on their results
