

CASE 2: CLIMATE CHANGE FAMILIES

<https://www.youtube.com/watch?v=U2Tezpgku0I>

Families in several countries seriously affected by climate change and natural disasters including Portugal have decided to sue the EU for not meeting the agreed targets from the 2016 Paris Accord. The families need money to hire lawyers to represent them in court.

Guiding questions:

1. Have the cases been in the news recently?
2. Is there a high likelihood that the families will succeed in their case?
3. What will the crowdfunding achieve and what will be the timeline?
4. What do you expect the other groups to criticise you about crowding for this cause?
