

YOUR STORY – ROBOT BURIAL

He tapped the robot's padded frame
hearing the metal clang

He nearly set the bottle on the frame of
the robot

She was a household robot, right?

Even with true A.I. outlawed it's easy to
form attachments

She's dinged up but are you sure she's
dead.

The body really was a powered-off jumble
of foam, plastic and metal

What graveyard is going to allow a robot
to be buried there

The robot was bought to assist my mother
with chores even before her diagnosis

I bet we end up with robot cemeteries
like they have pet cemeteries

He reached out to the prone robot and
folded flesh-toned padding into place
